

ADMIN : only admin Login → very secured.

Can manage.

Each Category.

add, edit, delete, update

Each Business Shop.

Create, delete, update, modify, view.

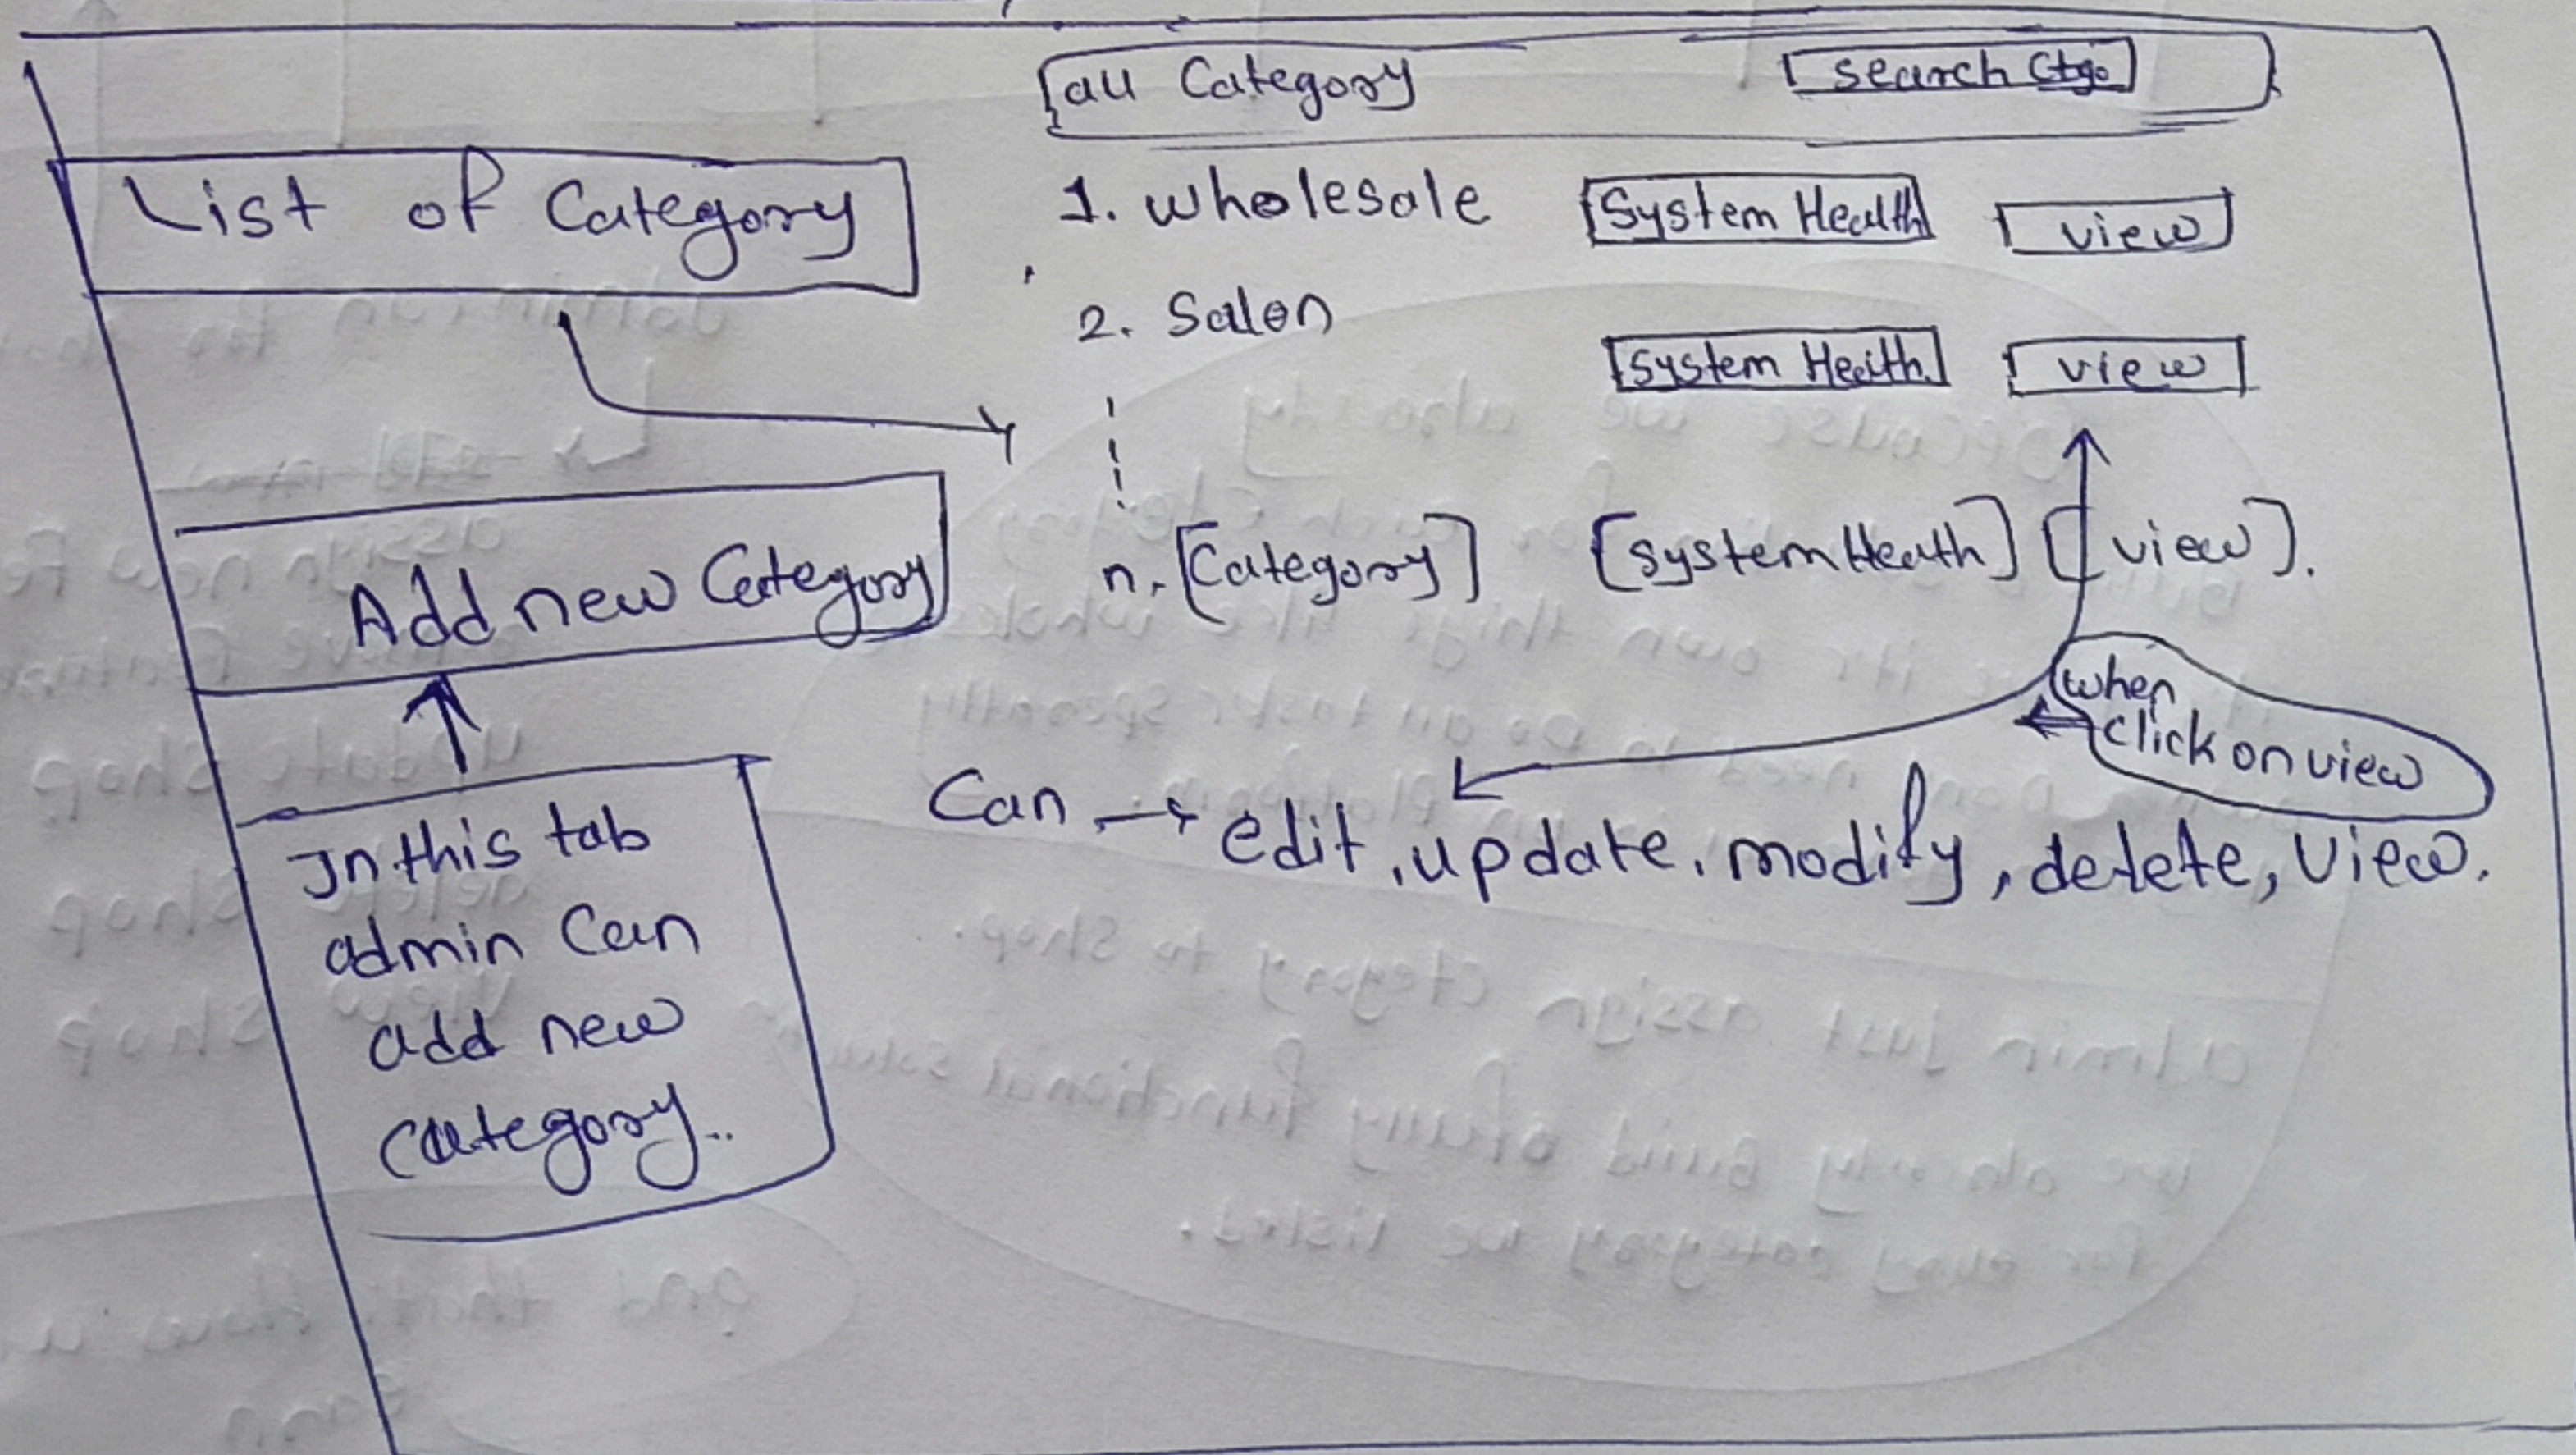

Service checkbox.

when a Business need any feature
Admin can just check that feature
Box to activate for that Business.

If any Business/shop don't want
any feature then admin can uncheck
that feature Box for that shop.

It's something look like this.

Admin Can.

add new shop or assign.

Shop name

Category

(Optional) whatsapp Number

add shop

that shop details to show on this system while they use.

which is connected to the main system when Admin select Wholesale it's Bring wholesale system in dropdown to assign for that shop.

List of shop.				
Shop ID.	detailr	Category	status health	Operation.
001W	Gumukirana	Wholesale	Good	view
002S	Roky Salon	Salone	Good	view

admin can for that shop.

- ↳ ~~add new~~ assign new Feature.
- remove Feature
- update shop
- delete shop
- view shop

Because we already Build a solution for each category it's have it's own things like wholesale owner Don't need to do all tasks separately they can have all in on Platform.

Admin just assign category to shop. we already Build a fully functional solution for every category we listed.

and that's how we earn.
